### 19-21.11.2019, EFECS 2019

The annual EFECS International Forum, co-organized by AENEAS, ARTEMIS-IA, EPoSS, the ECSEL Joint Undertaking, and the European Commission, together with EUREKA, took place in 2019. In Helsinki, Finland. To ensure effective visual participation in the event, PRYSTINE partners performed excellently to organize a large joint project booth in conjunction with related AutoDrive, NewControl and AI4DI projects under the umbrella of Lighthouse Mobility E-initiative. A sizeable collaborative project stand with posters and videos, organized as a great collaboration between the project partners in disseminating the project.

13.12.2019, PRYSTINE PMT Meeting

The project management team (PMT), together with members from the invited Innovation Technology and Advisory Board (ITAB), met to discuss progress since the first review and to prepare for the interim assessment.

24.12.2019, PRYSTINE 1st Review

A Science X™ leading web-based science, research and technology news service covering a full range of topics like physics, earth science, medicine, nanotechnology, electronics, space, biology, chemistry, computer sciences, automotive engineering, mathematics, and other sciences and technologies released an article about PRYSTINE research. More specifically, about the research work "AD-EYE: A co-simulation platform to verify functional safety concepts (FSCs) in self-driving vehicles" investigated by project Partner KTH.

Upcoming events:

24.06.2020 ECSEL JU Symposium in Brussels, Belgium
27-30.07.2020 Automated Vehicles Symposium Hilton San Diego Bayfront San Diego, CA
1-2.09.20202 13. Graz Symposium Virtual Vehicle (GSVF) Seifenfabrik, Graz, Austria
3-6.09.2020 The 32nd IEEE International Symposium on Power Semiconductor Devices and ICs (ISPSD) TBD
22-24.09.2020 European Research and Innovation Days Brussels Belgium
7-9.04.2021 Industry Strategy Symposium Europe (ISS Europe) TBD
