

Welcome! This is the first issue of the PRYSTINE Newsletter. PRYSTINE is a 3-year project co-funded by the ECSEL JU and National Authorities

## Dissemination Events

**Electric Connected Automated Cars invented for the 2030 Customer - ECA2030 event in Graz 09.10.2018 in Graz, Austria**

PRYSTINE was presented during the final review of 3Ccar at Helmut List Halle in Graz, where the third ECA2030 event was held. This even brought together a large number of stakeholders and initiated discussions in an exhibition space of 3Ccar technical demonstrators.

**ECA2030**  
Electric Connected Automated Consumer

**PRYSTINE and Maserati co-teaching activities at MUNER: Motorvehicle University of Emilia-Romagna 14.11.2018 in Bologna, Italy**

On 14th of November 2018, experts from PRYSTINE partner Maserati started co-teaching activities at MUNER: Motorvehicle University of Emilia-Romagna, located in Italian Motor Valley. The teaching course is part of the Advanced Automotive Electronic Engineering teaching program. The first seminar was focused on ADAS systems.

**PRYSTINE at European Forum for Electronic Components and Systems EF ECS2018 20/22.11.2018 in Lisbon, Portugal**

PRYSTINE, together with other Lighthouse Mobility.E related projects AutoDrive and 3Ccar, was presented during the European Forum for Electronic Components and Systems (EF ECS2018) in Lisbon, Portugal. Project partners have organized an impressive joint conference booth with project posters and technological demonstrators: in-wheel motor and inverter, and highly integrated 4x4 MIMO 79GHz radar module.

## Upcoming Events

20-21 of February 2019  
Sustainable Urban Mobility  
Bilbao Congress 2019  
Bilbao, Spain

22-26 of April 2019  
2019 IEEE Radar Conference  
where PRYSTINE will  
be presented by IMEC  
Massachusetts USA

10-14 of June 2019  
Summer School on Cyber-Physical Systems collocated with 7th EUROMICRO/IEEE Workshop on Embedded and Cyber-Physical Systems and 8th Mediterranean Conference on Embedded Computing  
Budva, Montenegro
